What it takes to be a Superstar®

It isn’t easy to become a Texas Superstar® plant. Only the toughest, most reliable and best-looking plants make the cut. Every plant earning the Texas Superstar® designation undergoes several years of extensive field trials by Texas A&M AgriLife Research and the Texas A&M AgriLife Extension Service, both part of the Texas A&M System. They must be shown to be super-performing plants under Texas growing conditions. During the field trials, plants receive minimal soil preparation, reasonable levels of water and no pesticides. What does that mean to the average homeowner? It means landscape success with beautiful, proven, Texas-tough plants. Find these plants at your local nursery and be sure and look for the Texas Superstar® logo on the plant tags. Visit TexasSuperstar.com for additional details about these amazing stars. The term “Texas Superstar” is a registered trademark of Texas A&M AgriLife Research, Texas A&M System.

GO TEXAN

GO TEXAN is the Texas Department of Agriculture’s program promoting the products, culture and communities that call Texas home. As a mark of Lone Star pride, the GO TEXAN logo – a glowing brand in the shape of Texas – can be found on everything from floral products and grapefruit to cowboy boots and retirement destinations. For more information see GoTexan.org.

ANGELONIA, SUMMER SNAPDRAGON
Angelonia angustifolia
Serena series

Angelonia is a spreading annual with upright flower spikes that resemble miniature snapdragons. The Serena series are the only angelonias that are grown from seed. Flower colors available include white, pink, purple, lavender, and lavender pink which flower season long until frost. Angelonia can be used as a border planting, a ground cover, or as a trailing plant for mixed containers.

Exposure: full sun
Height: 12 to 18 inches
Plant type: annual
Planting time: spring
Soil type: most soil types as long as well drained
Suggested uses: mass bedding or ground cover, mixed borders, and containers
Special Notes: Very reliable performer in all areas of Texas; tolerates heat well.

“BABY’S BREATH”
Euphorbias
Euphorbia hypericifolia
(syn. Chamaesyce hypericifolia)

These Euphorbias are very fine textured, rambling annuals that present the appearance of a cloud of white in the landscape. Very well suited for the hot Texas summers, these unusual plants perform well as edging, ground cover, and mixed container plants. Several varieties performed well in the Texas Superstar® trials, including “White Manaus”, “Breathless White”, “Silver Fog” and “Hip Hop” and thus are all recommended.

Exposure: Full sun.
Height: 12 to 18 inches
Plant type: annual
Planting time: spring
Soil type: well-drained soil
Suggested uses: flower beds, meadows and hillsides
Special notes: The Texas bluebonnet, which blooms between March and May, has a blue flowering stalk tipped with white (like a bunny’s tail). These hearty plants rarely suffer from insect and disease problems, however a well-balanced fertilizer applied in the fall will help with flower production.

TEXAS BLUEBONNET
Lupinus texensis
USDA Zone 7

The Texas state flower is a hardy winter annual native to Texas. This species is the most commonly seen variety along roadsides and in pastures throughout the state. Flowers are densely arranged on a spike with a characteristic ice white terminal tip.

Exposure: full sun
Height: 12-24 inches
Plant type: annual
Planting time: fall
Soil type: well-drained soil
Suggested uses: flower beds, meadows and hillsides
Special notes: The Texas bluebonnet, which blooms between March and May, has a blue flowering stalk tipped with white (like a bunny’s tail). These hearty plants rarely suffer from insect and disease problems, however a well-balanced fertilizer applied in the fall will help with flower production.
**Texas Maroon Bluebonnet**

*Lupinus texensis, 'Texas Maroon', 'Alamo Fire'*

USDA Zone 7 —

A selection of the Texas state flower is a hardy winter annual native to Texas. Flowers are densely arranged on a spike with a characteristic ice white terminal tip.

**Exposure:** full sun  
**Height:** 12-14 inches  
**Plant type:** annual  
**Planting time:** fall  
**Soil type:** well-drained soil  
**Suggested uses:** bedding, window boxes, patio containers and hanging baskets  
**Special notes:** Texas maroon bluebonnets have a spreading growth habit and reddish-maroon flowers with a characteristic white terminal tip. It is recommended they are spaced 12 inches apart when transplanting or seeding.

**Lady Bird Johnson Royal Blue Bluebonnet**

*Lupinus texensis 'Lady Bird Johnson Royal Blue'*  

USDA Zone 7 —

A selection of the Texas state flower with a distinct royal (cobalt) blue color named in honor of former first Lady, Lady Bird Johnson; flowers are densely arranged on a spike with a characteristic ice white terminal tip.

**Exposure:** full sun is essential for optimum bloom  
**Height:** 12 to 14 inches  
**Plant type:** annual  
**Planting time:** sow scarified seed in the fall; if one misses the planting window, transplants can be set out in late winter.  
**Soil type:** numerous, but most be well drained.  
**Suggested uses:** accent beds, meadows and hillsides as well as containers.  
**Special notes:** The distinct cobalt color sets this bluebonnet apart from the Texas Bluebonnet. It is a vigorous plant and will do best if spaced 12 inches apart. It tends to produce more seed than other bluebonnets so it should easily naturalize in an area given proper care.

**Cool Season Euphorbias**

*Euphorbia l. martini, E. characias subsp. wulfenii, E. amygdaloides*

USDA Zone 6  

These cold and drought tolerant winter annuals provide mounds of color in the landscape from fall to spring in all parts of Texas. They are not fond of summer heat, but may behave as perennials in western Texas. For a tight mounding plant of bluish green foliage, select ‘Tiny Tim’. For variegated foliage, try ‘Ascot Rainbow’. For more of a red or dark maroon color, try ‘Blackbird’. ‘Rudolph’ has dark green foliage with red accents. ‘Tasmanian Tiger’ or ‘Glacier Blue’ is notable for excellent cream and green variegated foliage. All are recommended.

**Exposure:** Full sun to partial shade  
**Height:** 1 to 2 feet  
**Plant type:** cool season annual  
**Planting time:** late summer and fall  
**Soil type:** best in potting soil in containers, but will perform in ground beds if soil is very well drained  
**Suggested uses:** best use is in mixed containers, but also in well drained landscape beds or rock gardens  
**Special Notes:** Very pest and disease resistant. They are hardy to zone 6 and hardy in containers unless the temperature drops below 15°F. The most heat tolerant are ‘Ascot Rainbow’ and ‘Tiny Tim’.

**Globe Amaranth**

*Gomphrena gracilis*

Globe amaranth (known by some as bachelor’s buttons) are versatile, often overlooked summer annuals that thrive in the Texas heat. Varieties range in size from 8 inches to 48 inches, and vary in color from whites, to pinks, to lavendars, to dark, rich purples. Many named variety series were tested and found to be true Texas Superstar® including the All Around, Las Vegas, QIS, and Audray series and Fireworks.

**Exposure:** Full sun  
**Height:** 1 - 4 feet and about as wide depending on variety  
**Plant Type:** heat-loving, summer annual  
**Planting Time:** early summer after nights have become warm  
**Soil Type:** well-drained; tolerates wide range of soil types  
**Suggested use:** mass plantings, combination plantings with other summer annuals such as salvias and Mexican mint marigold, and also make nice cut flowers for beautifying the indoors.

**Dakota Gold Helenium**

*Helianthus amarum Dakota Gold*

Helenium is a native Texas wildflower that now has improved cultivars for garden use. Plants are Texas tough, continuing to grow and flower with little or no irrigation once established. Young plants are small flattened rosettes of foliage in the spring (or even late winter in southern locations) that develop strong tap roots. By mid- to late spring a canopy of thready dark green foliage develops and 1” diameter bright yellow composite flowers begin to appear. Flowering continues through autumn. The cultivar ‘Dakota Gold’ grows typically as low cushions of foliage topped with bright yellow flowers. Plants can be grown on most any well drained soil with a sunny exposure. Good for low input landscapes where irrigation water is limited.

**Exposure:** Full sun  
**Height:** 6 to 8 inches  
**Plant Type:** reseeding annual  
**Planting Time:** anytime from containers  
**Soil Type:** well drained slightly acidic soil is best, but it adapts to alkaline clay soils as long as drainage is adequate  
**Suggested uses:** accent, border  
**Special notes:** PVP 200600009 issued June 22, 2010.
Larkspur
Consolida ambigua
USDA Zone 7
This reseeding annual has a backward-projecting spur, formed by the upper petal of the flower. The long spikes or panicles of flowers come in both single and double forms. Colors range from various shades of blue or purple to pink and white. The soft, lacy foliage makes a great backdrop for the showy flower spikes.
Exposure: full sun for best bloom but will tolerate partial shade
Height: 36 inches
Plant type: reseeding annual
Planting time: fall
Soil type: well-drained soil
Suggested uses: in bedding, window boxes, patio containers and hanging baskets
Special notes: The Rocket Larkspur performs best in hardiness zone 7, spaced 10-12 inches apart. Disease or pest problems are minimal if plants are grown in well-drained soils.

Rio Series Mandevilla
Mandevilla syn. Dipladenia
The Rio series mandevillas sport glossy foliage and broad, showy, trumpet-shaped flowers that come in pink, hot pink, and deep red. These mandevillas grow upright with little twining. These compact plants grow best in patio containers, and can be grown alone or mixed with other annuals wherever a splash of color is needed. They tolerate summer heat, but would benefit from some afternoon shade.
Exposure: full sun for part day; likes afternoon shade
Height: 1-2 feet and about as wide
Plant Type: treat as a summer annual in most of Texas; perennial in south Texas
Planting Time: spring or early summer
Soil Type: well drained container mix, or in soil bed with high organic matter and good drainage
Suggested use: accent plant in container on patio
Special notes: Excellent plant around pools or wherever a colorful, tropic effect is needed.

Mari-mum
Tagetes erecta
There are several different varieties of African-type (large-flowered) marigolds such as the Antigua, Discover, or Taishan series which can be used to produce the Mari-mum effect. The Mari-mum type marigolds bloom two to three times longer than chrysanthemums and are very low maintenance.
Exposure: full sun
Height: 8-16 inches
Plant type: annual
Planting time: transplant in late summer using plants with only tight flower buds showing – preferably no open flowers
Soil type: well-drained soil with organic matter
Suggested uses: Mari-mums have such visual impact that they’re a wonderful choice for mass planting along the front edge of a flower bed, walkways or garden paths. Mari-mums also do extremely well in containers.
Special notes: Applying 1-2 pounds of a slow release lawn fertilizer per 100 square feet of bed area will enhance blooming.

Laura Bush Petunia
Petunia x ‘Laura Bush’
This is an old-fashioned reseeding petunia. It is more cold tolerant, disease resistant and heat tolerant than modern hybrids.
Exposure: full sun
Height: 24 inches
Plant type: annual
Planting time: spring and summer
Soil type: well-drained soil
Suggested uses: bedding, window boxes, patio containers and hanging baskets
Special notes: The Laura Bush petunia performs best in hardiness zone 7. It has a spreading growth habit with medium-size violet flowers. It grows best when transplanted 36 inches apart. This Texas Superstar blooms from spring until frost. Between bloom cycles, prune back by 20 percent and lightly fertilize.

Tidal Wave Silver and Cherry Petunia
Petunia x hybrida
These petunias represent two colors from the Tidal Wave series of petunia. They are more heat, disease and cold tolerant than typical grandiflora type petunias. The vigor of these plants ensures a plentiful flower supply during the summer and into the fall.
Exposure: full sun
Height: 18-20 inches but can spread 4 feet
Plant type: annual
Planting time: spring and summer, can be planted in October/November for late-winter and early-spring flowering
Soil type: adaptable to different soil types as long as well-drained
Suggested uses: bedding, ground cover, large containers
Special notes: Flowers are more vibrant if drip irrigation is used. Drought tolerant, but benefits from regular watering and regular fertilization. If trimming is desired in mid to late summer, the plants can be lightly trimmed about 20 percent (a string trimmer works well). Water and lightly fertilize after trimming to stimulate growth and flowering.
### Perennials

<tbody>
<tr>
<td>Butterfly Deep Pink Pentas</td>
<td>Pentas lanceolata</td>
<td>High heat, soil, and pest tolerant, this very low maintenance tropical annual provides a profusion of bright pink blooms spring through late fall. Excellent for mass plantings and containers where it attracts butterflies and hummingbirds.</td>
</tr>
<tr>
<td>Vinca Cora Series</td>
<td>Catharanthus roseus</td>
<td>Cora and Nirvana vinca (commonly referred to as periwinkle) are the first varieties of this species to be resistant to the Aerial Phytophthora fungus, a devastating disease that until now limited the use of this species in Texas landscapes. In addition, they are heat and humidity tolerant and deer resistant. They are available in a wide array of colors with either upright or trailing habits and flower throughout the summer with some of the largest flowers in the genus.</td>
</tr>
<tr>
<td>Fall Zinnias</td>
<td>Zinnia marylandica, Zinnia hybrid, and Zinnia elegans</td>
<td>The Profusion and Zahara series of zinnia produce disease resistant mounds of color that last until frost when planted in late summer. The more traditional flowers of the Dreamland and Magellan series can also be enjoyed at this time of year while avoiding the disease issues that can show up in the spring. All have vibrant colors with the cool nights of fall on sturdy compact plants.</td>
</tr>

---

*Ask a certified nursery professional at your local nursery for Texas Superstars and support local Texas producers.*
Flare Perennial Hibiscus

*Hibiscus x 'Flare'*
USDAZone5

This herbaceous perennial has apple-green foliage and large iridescent fuchsia-red flowers up to 10 inches wide.

**Exposure:** full sun  
**Height:** 3-4 feet  
**Plant type:** perennial  
**Planting time:** spring  
**Soil type:** any soil type, including high alkaline clays  
**Suggested uses:** perennial border, butterfly and hummingbird gardens and containers  
**Special notes:** The Flare hibiscus performs best in hardiness zone 5. It produces large leaves and is a profuse bloomer with a mounding habit. It is also self-sterile, which encourages re-bloom. The Flare hibiscus will bloom from summer through the first frost.

Pink Flare and Peppermint Flare Hibiscus

*Hibiscus x 'Pink Flare' and 'Peppermint Flare'*  
USDAZone5

Part of the Flare Series, these showy perennials have large glowing fuchsia flowers. The offspring have the same superior traits as the original but their colors are pink and peppermint (white with red stripes). Their maple-like emerald-green foliage is very attractive on compact plants that are practically sterile, which encourages continuous bloom.

**Exposure:** full sun  
**Height:** 3-5 feet  
**Plant type:** herbaceous perennial  
**Planting time:** spring  
**Soil type:** any soil type, including high pH clays  
**Suggested uses:** perennial border, butterfly and hummingbird gardens  
**Special notes:** The Lord Baltimore performs best in hardiness zone 5. It has attractive foliage, provides stunning color, loves the heat and requires very little maintenance. It also has excellent pest and disease resistance, and works best with medium amounts of water.

Moy Grande Perennial Hibiscus

*Hibiscus x 'Moy Grande'*  
USDAZone5

The giant-flowered rose mallow has the largest flowers of any hardy perennial. These are descendants of the native hibiscus found in Louisiana and other Gulf Coast states. Ying Doon Moy cross-bred a *Hibiscus moscheutos* hybrid with *Hibiscus grandiflorus* to create the largest, open-face hibiscus flower in the world.

**Exposure:** full sun  
**Height:** 5 feet  
**Plant type:** perennial  
**Planting time:** spring  
**Soil type:** well-drained soil containing plenty of organic matter and nutrients  
**Suggested uses:** perennial border, butterfly and hummingbird gardens  
**Special notes:** Moy Grande will grow up to 5-feet wide and bloom between May and September. Removing spent flowers and developing seed pods will promote re-bloom. Flowers are usually 12 inches wide and have a rose-pink color. Moy Grande hibiscus will perform best in hardiness zone 5.

New Gold Lantana

*Lantana camera 'New Gold'*  
USDAZone8b

The New Gold Lantana is a low maintenance plant with golden yellow flowers. It is drought and heat tolerant, and its reduced fruit set promotes prolific blooming from spring until frost.

**Exposure:** full sun  
**Height:** 12-24 inches  
**Plant type:** small spreading woody shrub, herbaceous perennial or annual depending on the location  
**Planting time:** spring from containers  
**Soil type:** adapts to most soils from acidic to moderately alkaline with moderate drainage  
**Suggested uses:** accent, bedding, bank cover or patio containers  
**Special notes:** When well established, the plants are very drought tolerant and continue to produce bright and attractive blooms in the hottest of weather. Whiteflies can sometimes be a pest. This annual also needs periodic renewal pruning to remove old dead wood.
Trailing Lantana  
*Lantana montevidensis*  
USDAZone8b 🌼🌼

Beautiful trailing or spreading perennial with a profusion of lavender, purple or white flowers that bloom consistently from spring through frost and attract butterflies. Outstanding heat, wind & drought tolerance.

**Exposure:** Full sun  
**Height:** 1 foot tall, 4 feet wide  
**Plant type:** perennial  
**Planting time:** spring to summer from containers  
**Soil type:** adapts to most soils from acidic to moderately alkaline with moderate drainage  
**Suggested uses:** mass bedding, ground cover or bank cover, and as a spill over the edge of beds above garden walls or in containers  
**Special Notes:** Hardy to zone 8b and resistant to lantana lacebug.

Turk’s Cap  
*Malvaviscus arboreus var. drummondii*  
USDAZone7b 🌼🌼

A rapidly growing, coarse textured plant that produces a profusion of “turban-like” flowers in various colors ranging from bright red to pink to white. Flowers are produced all summer, but heavily in the fall and attract hummingbirds and butterflies. Turk’s cap is native to south Texas, where it becomes an established perennial, but in north Texas it should be used as an annual. Turk’s Cap is very drought tolerant once established. The cultivar “Pam Puryear” has soft pink flowers and ‘Fiesta’ is a variegated form with yellow and white splotched leaves.

**Exposure:** Sun or shade; flowers heavier in sun, but the foliage is more attractive with some shade  
**Height:** 3 to 6 feet with about equal spread  
**Plant type:** perennial  
**Planting time:** anytime from containers  
**Soil type:** adaptable to most soils  
**Suggested uses:** accent, perennial border, butterfly and hummingbird gardens, and as a deciduous hedge  
**Special notes:** Root-hardy perennial in most of Texas including to zone 7b.

Dwarf Mexican Petunia  
*Ruellia brittoniana*  
(various dwarf cultivars)  
USDAZone8 🌼🌼  

Under proper growing conditions, dwarf Mexican petunias tend to reseed and produce tall upright clumping, dark green plants with lance-shaped leaves and bright, tubular flowers when in full bloom during the hottest part of the summer.

**Exposure:** full sun to partial shade  
**Height:** 6-8 inches  
**Plant type:** herbaceous perennial or annual depending on the location  
**Planting time:** spring to summer from containers  
**Soil type:** adapts to most soils from acidic to moderately alkaline with moderate drainage  
**Suggested uses:** accent, small scale groundcover, perennial borders, edging or mixed plantings  
**Special notes:** Dwarf Mexican petunias are very adaptable and will tolerate both wet and dry soils. They prefer full sun, but will grow in shade though flowering will be less. Although dwarf Mexican petunias are drought tolerant once established, they perform best with regular irrigation during droughts and with regular feeding of high phosphorus fertilizers.

John Fanick Perennial Phlox  
*Phlox paniculata*, ‘John Fanick’  
USDAZone4 🌼🌼

Masses of fragrant, light pink flowers sporting a dark pink eye in the summer highlight this heat and drought resistant perennial. It blooms several weeks later than Victoria phlox and does not lodge as easily as Victoria. It is more disease resistant as well.

**Exposure:** full sun for best bloom but will tolerate partial shade  
**Height:** 24-36 inches  
**Plant type:** perennial  
**Planting time:** spring  
**Soil type:** well-drained soil  
**Suggested uses:** specimen and background in perennial gardens  
**Special notes:** The John Fanick perennial phlox has attractive evergreen foliage with a compact growth habit. It is a hardy perennial with showy clusters of magenta pink blossoms. It also has lighter green foliage and a more open growth habit than the John Fanick. This Texas Superstar tolerates heat, drought and powdery mildew, but avoid overhead irrigation with salty water. Plants should be spaced between 24 and 36 inches apart. Cut back in late summer for fall blooms.

Victoria Perennial Phlox  
*Phlox paniculata* ‘Victoria’  
USDAZone4 🌼🌼

This heat and drought resistant perennial sports masses of purplish-pink (magenta) flowers in the summer and in the fall (if cut back after summer bloom occurs).

**Exposure:** full sun for best bloom but will tolerate partial shade  
**Height:** 24-36 inches  
**Plant type:** perennial  
**Planting time:** spring  
**Soil type:** well-drained soil  
**Suggested uses:** specimen and background in perennial gardens  
**Special notes:** The Victoria perennial phlox has an attractive evergreen foliage with a compact growth habit. It is a hardy perennial with showy clusters of magenta pink blossoms. It also has lighter green foliage and a more open growth habit than the John Fanick. This Texas Superstar tolerates heat, drought and powdery mildew, but avoid overhead irrigation with salty water. Plants should be spaced between 24 and 36 inches apart. The ideal hardiness zone is 4.

---

Ask a certified nursery professional at your local nursery for Texas Superstars and support local Texas producers.
**Cape Plumbago**  
*Plumbago auriculata*  
USDAZone 8b  
Cape Plumbago produces profuse blue flowers and thrives in the hot Texas summer. It is sometimes called “sky flower” because of the sky-blue color of its flowers. It produces from May until the first frost.

**Exposure:** full sun; partial sun  
**Height:** 4 feet tall, up to 5 feet wide  
**Plant type:** perennial  
**Planting time:** anytime from containers  
**Soil type:** adapts to most soils from acidic to moderately alkaline with moderate drainage  
**Suggested uses:** container or accent plant  
**Special notes:** Dried flowers should be pruned from the Plumbago to encourage re-blooming and to maintain desired plant shape. It is excellent for attracting butterflies. It can handle hot, humid summers and is reasonably drought tolerant. Imperial Blue is a variety that holds its color well.

**Mexican Bush Sage**  
*Salvia leucantha*  
USDAZone 8  
A tough, drought tolerant, highly pest resistant salvia with showy spikes of purple and white, or solid purple, blossoms that appear in the fall. Also good as a cut flower.

**Exposure:** Full sun  
**Height:** 3 to 4 feet tall, 3 feet wide  
**Plant type:** perennial  
**Planting time:** spring or summer from containers  
**Soil type:** adaptable, but needs excellent drainage  
**Suggested uses:** accent, bedding, perennial borders  
**Special notes:** Perennial in southern half of state to zone 8 with good drainage. Stems brittle - protect from high winds.

**Henry Duelberg Salvia**  
*Salvia farinacea*  
USDAZone 7  
Henry Duelberg is a low-maintenance; heat-tolerant, Texas native plant that produces masses of showy blue flowers from spring until the first frost.

**Exposure:** full sun  
**Height:** 3 feet; width 3 feet  
**Plant type:** perennial  
**Soil type:** adapts to most soils  
**Suggested uses:** bedding, containers, xeriscape, perennial border, cut flower  
**Special notes:** Shearing frequently between bloom cycles will promote bloom development. Henry Duelberg is not preferred by deer.

**Mystic Spires Blue Salvia**  
*Salvia longisspiciata x farinacea ‘Mystic Spires Blue’*  
USDAZone 7  
Mystic Spires Blue Salvia is a compact form of another popular salvia called Indigo Spires. Though shorter than Indigo Spires, it flowers even more freely during the entire growing season. It produces masses of true blue flowers that mix nicely with other annuals and perennials, is tolerant of heat and humidity (low and high) and is not bothered by pests, diseases or deer!

**Exposure:** full sun  
**Height:** 18-30 inches  
**Plant type:** perennial  
**Planting time:** spring to summer from containers  
**Soil type:** adaptable, but needs excellent drainage  
**Suggested uses:** bedding, containers, perennial border, cut flower  
**Special notes:** Mystic Spires Blue Salvia is hardy to zone 7 with good drainage. Excess water and fertilizer can result in excessive vegetative growth and lack of flowers. If needed, plants can be pruned during the growing season as reflowering occurs quickly. Shoots can be pruned to 12 inches or more in the fall after being killed by freezing, but refrain from pruning to the ground until growth is strong in the spring.

**Mexican Bush Sage**  
*Salvia leucantha*  
USDAZone 8  
A tough, drought tolerant, highly pest resistant salvia with showy spikes of purple and white, or solid purple, blossoms that appear in the fall. Also good as a cut flower.

**Exposure:** Full sun  
**Height:** 3 to 4 feet tall, 3 feet wide  
**Plant type:** perennial  
**Planting time:** spring or summer from containers  
**Soil type:** adaptable, but needs excellent drainage  
**Suggested uses:** accent, bedding, perennial borders  
**Special notes:** Perennial in southern half of state to zone 8 with good drainage. Stems brittle - protect from high winds.

**Blue Princess Verbena**  
*Verbena x hybrida ‘Blue Princess’*  
USDAZone 7b  
This butterfly-attracting, easy care perennial has masses of beautiful, lavender blue flowers.

**Exposure:** full sun  
**Height:** 12 inches  
**Plant type:** perennial  
**Planting time:** spring  
**Soil type:** well-drained soil  
**Suggested uses:** bedding plant, containers, baskets, perennial border, butterfly and hummingbird gardens  
**Special notes:** The Blue Princess verbena blooms early spring through late fall. Shear between bloom cycles to promote new blooms. Rose Princess is also available. Both are available as virus indexed plants.
**Pride-of-Barbados**  
*Caesalpinia pulcherrima*  
**USDAZone8b**

Pride of Barbados is an evergreen shrub or small tree in frost-free climates, a deciduous shrub in zone 9, a returning perennial in zone 8 and an annual in North and West Texas. Pride-of-Barbados dies to the ground following frost or freezing temperatures, but in zone 8b (South Central Texas) it comes back reliably in middle spring. Pride-of-Barbados has incredibly showy blossoms of orange and red. The striking orange-red flowers are an attention grabber!

**Exposure:** full sun  
**Height:** 8-12 feet  
**Plant type:** evergreen shrub or small tree in subtropical and tropical climates.  
**Planting time:** anytime from anytime from danger of frost is past  
**Soil type:** well-drained soil  
**Suggested uses:** use as a mixed shrub border, mass plantings, specimen or in a Landscape  
**Special notes:** Plants tolerate very high temperatures and drought, but do not tolerate poorly drained soils. Pride-of-Barbados is best grown in raised beds in humid climates.

**Duranta**  
*Duranta erecta*  
**USDAZone9**

Brazilian Sky Flower is a rapid-growing, dense shrub with small glossy leaves and a profusion of pendulous racemes of small flowers with colors varying from light blue to purple.

**Exposure:** sun or shade; flowers heavier in sun  
**Height:** 12-15 feet in south Texas depending on pruning  
**Plant type:** root-hardy perennial  
**Planting time:** spring  
**Soil type:** adapts to most soils  
**Suggested uses:** can be used as a container plant or an accent plant in a Landscape  
**Special notes:** Some selections fruit heavily and the plant becomes covered with small, golden ball-like drupes. Must be treated as an annual-root hardy perennial in most parts of Texas, but will be perennial in South Texas. Brazilian Sky Flower blooms best from summer until the fall.

**Gold Star Esperanza**  
*Tecoma stans ‘Gold Star’*  
**USDAZone9**

This heat-loving, semi-evergreen shrub has golden-yellow bell-shaped flowers late spring through fall.

**Exposure:** full sun  
**Height:** 4 feet  
**Plant type:** root hardy perennial  
**Planting time:** spring  
**Soil type:** well-drained soil  
**Suggested uses:** containers, flower beds, butterfly and hummingbird gardens  
**Special notes:** Gold Star esperanza is recommended for hardiness zone 9. It has attractive glossy foliage and grows up to 3-feet wide. Gold Star esperanza requires medium amounts of water. Water weekly in lieu of one inch of rain. Immediately remove the fruit (beans) after flowering to promote rebloom. Make sure you have Gold Star and not a tecoma grown from seed.

**Firebush**  
*Hamelia patens*  
**USDAZone9**

Firebush offers real hope to heat-hammered summer landscapes. Once established, firebush is very heat and drought tolerant. Firebush is an evergreen shrub or small tree native to many areas in tropical and subtropical America.

**Exposure:** full sun  
**Height:** 18-30 inches  
**Plant type:** annual from Central Texas northward, perennial in South Texas  
**Planting time:** set transplants from mid-May through summer months and space one foot apart  
**Soil type:** almost any well-drained soil, even highly alkaline, heavy clays  
**Suggested uses:** mass plantings with white blooming annuals, containers and hummingbird gardens  
**Special notes:** The firebush blooms between June and November with terminal clusters of scarlet red, tubular blossoms with deeper red throats. Its foliage turns to a blood red color in the fall. Firebush does not usually show signs of insect or disease damage when grown outdoors in a full sun location.

**Compact Spicy Jatropha**  
*Jatropha integerrima*  
**USDAZone9**

This subtropical evergreen shrub has glossy leaves and clusters of star-shaped bright scarlet or vermilion flowers. Jatropha is a spectacular shrub in bloom, which is most of the year in warmer portions of the state, and spring to frost in colder locations.

**Exposure:** best flowering is in full sun, but plants will remain attractive in partial shade  
**Height:** in tropical climates plants may grow 8-10 feet tall, but as patio plants or summer annuals they are usually 3-5 feet tall.  
**Plant type:** summer annual where winters are cold, woody shrub along the coast and in South Texas  
**Planting time:** spring after danger of frost is past  
**Soil type:** adapted to most well-drained garden soils and can be grown in a variety of potting mixes  
**Suggested uses:** use as a summer accent where frosts are frequent or in a mixed shrub border where winters are warm. Use as a container plant to attract butterflies and hummingbirds.  
**Special notes:** Fruit are reported to be poisonous, but appear to be seldom produced in most Texas regions.
**Variegated Tapioca**
*Manihot esculenta*
USDAZone11

Variegated Tapioca is a tropical plant grown as an annual in all but southernmost Texas. The variegated leaves form a chartreuse/yellow pattern. It is a non-blooming plant that offers a tropical flare to summer landscapes.

**Exposure:** full sun; partial sun, however plants are most colorful when grown in full sun

**Height:** 4 feet tall, up to 5 feet wide

**Plant type:** annual in all but southernmost Texas

**Planting time:** spring after last frost

**Soil type:** requires a well-drained soil or container potting mix and will tolerate a wide range of pH

**Suggested uses:** container or accent plant

**Special notes:** Variegated tapioca is a heat lover and does not grow vigorously until the night temperatures are consistently above 60°F. It will exhibit chilling injury when night temperatures dip below 50°F. Keep the growing medium moist, and mulch if planted in the soil. Plants will grow just as well in alkaline soil as they will in acidic soils. They are somewhat tolerant to foliar salt exposure in the Coastal Bend area.

---

**Thyrallis or Shower-of-Gold**
*Galphimia glauca*

**USDAZone8b

As the name implies, Shower-of-Gold offers season-long spikes of bright, yellow flowers; flowers are mostly held at or above the dark-green to blue-green foliage; with periodic pruning, plants develop a dense handsome canopy with enough flowers to draw the eye from a distance.

**Exposure:** full sun to very light shade

**Height:** 3-5 feet

**Plant type:** woody shrub (South Texas) or summer annual (North Texas)

**Planting time:** anytime from containers as a shrub, spring as a summer annual

**Soil type:** tolerant of most soils as long as they are well drained

**Suggested uses:** general-purpose evergreen shrub where a touch of silvery foliage is desired; other uses include as a foundation shrub, in island plantings, xeriscapes or in mixed borders; with appropriate substrate, it can be used in containers on sunny patios

**Special notes:** This plant blooms whenever temperatures permit; annual pruning will maintain a denser habit and plants work well when pruned back as a sub-shrub or herbaceous perennial.

---

**Lynn’s Legacy Cenizo**
*Leucophyllum langmaniae*

**USDAZone8

Lynn’s Legacy (also known as Lowery’s Legacy) was selected for its profuse and frequent flower displays. Its sage-green foliage is a wonderful backdrop for the lavender flowers. Compared to most selections of Texas sage, it is not as dependent on changes in relative humidity for flowering and can bloom more often during the course of the summer than other selections.

**Exposure:** full sun

**Height:** 5 feet

**Plant type:** woody shrub

**Planting Time:** anytime from containers

**Soil type:** tolerant of most soils as long as they are well drained and not soggy

**Suggested uses:** general-purpose shrub where a touch of silvery foliage is desired; other uses include as a foundation shrub, in island plantings, xeriscapes or in mixed borders; with appropriate substrate, it can be used in containers on sunny patios

**Special notes:** Multiple flowering flushes frequently occur during a growing season; avoid over-watering.

---

**Belinda’s Dream Rose**
*Rosa ‘Belinda’s Dream’*

**USDAZone7

A cross between ‘Tiffany’ and ‘Jersey Beauty,’ this fast growing shrub is upright and sturdy and has Bluish-green foliage. It blooms is a clean pink, double and high-centered rose in the classic hybrid tea style and has a rich fragrance. Blooms occur in abundance all through the warm months, especially if spent blooms are removed immediately.

**Exposure:** full sun for best bloom

**Height:** 5 feet

**Plant type:** shrub rose

**Planting time:** fall and spring

**Soil type:** well-drained soil is best but will grow in high alkaline clay soils

**Suggested uses:** shrub border, cut flowers, dried flowers for potpourri

**Special notes:** Belinda’s Dream performs best in hardiness zones 7-9. It has a bush habit and can be as wide as 4 feet. Needs day-long full sun and good air movement over the leaves. Drip irrigation or a soaker hose is recommended. The plant is occasionally attacked by black spot during the cool season but is usually vigorous enough to overcome the disease.

---

**Grandma’s Yellow Rose**
*Rosa ‘Nacogdoches’*

**USDAZone6

Grandma’s Yellow Rose is deep yellow with 17 to 25 petals and repeatedly blooms from spring until the first hard frost. Its new leaves have a shade of bronze, then turn dark green. Flowers have a light and spicy fragrance. It is a repeat bloomer from spring until frost and is quite disease resistant. It is cold hardy to zone 6.

**Exposure:** full sun for at least six hours per day

**Height:** 4-5 feet

**Plant type:** shrub rose with a floribunda type habit

**Planting time:** anytime from containers

**Soil type:** well-drained slightly acidic soil is best, but it adapts to alkaline clay soils as long as drainage is adequate

**Suggested uses:** accent, shrub border with perennials, low hedges, cut flowers

**Special notes:** Can be attacked by black spot during wet periods, mainly in the spring and fall. A few fungicide applications in the spring or during long wet periods will control the disease. Plants tolerate the disease well by readily producing new growth after defoliation
Knockout™ Rose
Rosa ‘Radrazz’
USDAZone4

The Knockout™ Rose produces fluorescent, cherry-red blooms that begin in spring and continue to provide color until the first frost.

**Exposure:** full sun  
**Height:** 3-4 feet, but can grow up to 5-feet high and 5-feet wide when mature  
**Plant type:** shrub rose  
**Planting time:** anytime from containers  
**Soil type:** adapts to most soils from acidic to moderately alkaline with reasonable drainage  
**Suggested uses:** accent, shrub border, rose garden or low hedges  
**Special notes:** The Knockout Rose grows well in planting zones 4 through 9 and is highly tolerant of black spot, powdery mildew and aphids. It is also cold-hardy throughout the state, will grow in a wide range of soils (even highly alkaline clays) and is very heat and drought tolerant once established. The double form is more compact and has more color impact.

Marie Daly Rose
Rosa x polyantha ‘Marie Daly’
USDAZone5

This easy care shrub rose has few thorns and lots of very fragrant, double pink blooms. It offers successive flushes of bloom from spring to frost. Developed for Texas, this rose offers a new color of renowned antique rose ‘Marie Pavie’ and good disease and alkaline soil tolerance.

**Exposure:** full sun  
**Height:** 3 feet  
**Plant type:** shrub rose  
**Planting time:** fall and spring  
**Soil type:** well-drained soil is best but will grow in high alkaline clay soils  
**Suggested uses:** cut flowers, dried flowers for potpourri and landscapes  
**Special notes:** Marie Daly Rose performs best in hardiness zone 5. It has a bush habit and can be as wide as 3 feet. Needs daylong full sun and good air movement over the leaves. Drip irrigation or a soaker hose is recommended.

Texas Lilac Vitex
Vitex agnus-castus
USDAZone7

The Texas Lilac Vitex is a small-flowering tree and grows best when planted in full sun and in a location that drains well.

**Exposure:** full sun  
**Height:** 10-15 feet  
**Plant type:** large deciduous woody shrub or small tree  
**Planting time:** anytime from containers  
**Soil type:** adapts to most soils from acidic to moderately alkaline with moderate drainage  
**Suggested uses:** accent, shrub border, seasonal screen or small-flowering tree  
**Special notes:** cut flowers, dried flowers for potpourri and landscapes  
**Special notes:** Texas Lilac Vitex needs periodic renewal pruning to remove old dead wood. It prospers in hot and dry environments. It is also a spectacular butterfly-attracting plant. The three cultivars of Texas Lilac available are Le Compte, Shoal Creek and Montrose Purple which all have exceptionally long flower spikes. Also available in pink and white. Avoid use in areas where it becomes weedy.

Possum Haw
Ilex decidua
USDAZone5

This outstanding small native tree requires very low maintenance. It will drop its leaves in fall to reveal showy red or orange berries (on female plants) that remain throughout the winter. Possum Haw attracts songbirds and is heat and drought tolerant.

**Exposure:** full sun to partial shade  
**Height:** 10-15 feet  
**Plant type:** large deciduous woody shrub or small tree  
**Planting time:** anytime from containers  
**Soil type:** adapts to most soils from acidic to slightly alkaline  
**Suggested uses:** accent, shrub border, fall to winter specimen, limbed up as a small ornamental tree  
**Special notes:** Possum Haw clones for fruit effects, however a male pollinator must be in the area. Possum Haw tolerates seasonal poorly drained soils.

Possum Haw
Ilex decidua
USDAZone5

This outstanding small native tree requires very low maintenance. It will drop its leaves in fall to reveal showy red or orange berries (on female plants) that remain throughout the winter. Possum Haw attracts songbirds and is heat and drought tolerant.

**Exposure:** full sun to partial shade  
**Height:** 10-15 feet  
**Plant type:** large deciduous woody shrub or small tree  
**Planting time:** anytime from containers  
**Soil type:** adapts to most soils from acidic to slightly alkaline  
**Suggested uses:** accent, shrub border, fall to winter specimen, limbed up as a small ornamental tree  
**Special notes:** Possum Haw clones for fruit effects, however a male pollinator must be in the area. Possum Haw tolerates seasonal poorly drained soils.

Shantung Maple
Acer truncatum
USDAZone6

This beautiful maple has a spreading canopy with attractive foliage that turns spectacular red or red-orange in late fall. It is reminiscent of Japanese maple but much tougher.

**Exposure:** full sun to partial shade  
**Height:** 25 feet  
**Plant type:** ornamental deciduous tree  
**Planting time:** fall and spring  
**Soil type:** various soil types and tolerates alkaline soils  
**Suggested uses:** shade tree for small yards  
**Special notes:** Shantung maples tolerate heat, however they are not adapt- ed to West Texas, and the trunk must be wrapped the first three years to prevent sunscald. Performs best in hardiness zone 6.
Lacey Oak  
*Quercus glauoides*  
USDAZone7 ◇

This beautiful small oak, native to the Texas Hill Country, has a spreading canopy with attractive bluish-green foliage. Lacey oaks are highly tolerant of heat, drought, alkaline soil and pests. They make wonderful shade trees for smaller yards.

**Exposure:** full sun  
**Height:** 25 feet  
**Plant type:** deciduous tree  
**Planting time:** fall and spring  
**Soil type:** will survive in well-drained clay soils, but grows best in well-drained limestone soils

**Suggested uses:** Xeriscapes or low water-use landscapes are perfect conditions for growing Lacey oak. Works best as a shade tree in a small to medium landscape.

**Special notes:** Best adapted to the western two-thirds of the state. Don’t water too frequently.

Chinkapin Oak  
*Quercus muehlenbergii*  
USDAZone5 ◇

Chinkapin Oak is an attractive medium to large shade tree suitable for use in much of Texas. Its distinctive saw-tooth leaves, which resemble those of the chinquapin tree found in the eastern United States, are a rich green, turning yellow to bronze in fall.

**Exposure:** full sun  
**Height:** 50-60 feet  
**Plant type:** large deciduous tree  
**Planting time:** anytime from containers  
**Soil type:** adapts to most soils from slightly acidic to moderately alkaline with moderate drainage  
**Suggested uses:** shade tree, street tree or park tree  
**Special notes:** It grows in the wild on well-drained bottomland soils and limestone hills near water, but it is adaptable to a range of soils and exposures. It is moderate- to fast-growing and develops an open rounded crown as it ages. Chinkapin oak is heat and drought tolerant, which makes the species widely adaptable throughout Texas.

Chinese Pistache  
*Pistacia chinensis*  
USDAZone5 ◇

This is a long-lived shade tree with spectacular red, red-orange fall color. It has outstanding heat and drought tolerance and is extremely pest resistant.

**Exposure:** full sun  
**Height:** 40-50 feet  
**Plant type:** deciduous shade tree  
**Planting time:** fall (September through November) is best  
**Soil type:** grows in any type of soil; try to avoid heavy clays that hold water  
**Suggested uses:** ideal size for shade for single-story homes  
**Special notes:** Develops an umbrella-like canopy and has a width of 30 feet. Fruit set will only occur on female trees which can result in undesirable seedlings. Choose male selections when possible. Light but frequent fertilizations are recommended. Once established, it has superior drought, heat and wind tolerance but will not tolerate excess or standing water. The ideal hardiness zone is 5.

Natchez Blackberry  
*Rubus fruticosus ‘Natchez’*  
USDAZone5 ◇

Natchez blackberry is a thornless cultivar out of the University of Arkansas. It is a trailing plant that produces an abundance of large, elongated fruit. The fruit is the largest produced by a thornless cultivar. Fruit quality is firm and outstanding and could be a commercial variety.

**Exposure:** full sun for maximum production  
**Height:** Canes are trailing and can attain heights of six to eight feet. Some sort of trellis will be in order to keep the canes off the ground.  
**Plant type:** biennial; grow a top the first year, those canes fruit the next year and then they die. The plant sends up new canes each growing season for the next year’s crop.  
**Planting time:** Plant dormant root cuttings in early winter or plants in early spring three feet apart.  
**Soil type:** numerous as long as they remain moist  
**Suggested uses:** ideal for those transition beds from sunny courtyards to the dense shade of entryways; can also be used in interioriescapes and containers.

**Special notes:** Caricature Plant is an excellent summer annual for a wide range of light conditions from full sun to dense shade. Several new cultivars on the market offer foliage that varies from dark green or chocolate bronze with creamy white centers to tricolor foliage with various combinations of green, white, cream and pink.

**Exposure:** full sun to dense shade  
**Height:** 2-4 feet as an annual, to 6-8 feet as a tropical shrub  
**Plant type:** summer annual (cold climates) or woody shrub (tropics)  
**Planting time:** anytime from containers as a shrub, late spring for use as a summer annual  
**Soil type:** tolerant of most soils as long as they remain moist during the growing season  
**Suggested uses:** ideal for those transition beds from sunny courtyards to the dense shade of entryways; can also be used in interioriescapes and containers.

**Special notes:** Caricature Plant is very heat tolerant, but wilts under drought conditions; it is cold sensitive and can be damaged by temperatures much below 55° F.
Moth Orchid
Phalaenopsis
USDAZone11

The moth orchid is one of the best orchids for growing in the home. Clumped orchid plants in small pots are usually the most spectacular bloom producers.

Exposure: place near bright windows with no direct sun
Height: 2 feet
Plant type: sub-tropical indoor plants
Planting time: pot in late spring or early summer, after blooming has completed

Soil type: well-draining mix, such as fir bark, tree fern fiber, various types of stone, peat moss or combinations; standard potting mixes will kill them
Suggested uses: interior plants to add color to a home or office
Special notes: Keep the temperature above 60° F at night and between 70° F and 82° F during the day. Temperatures below 78° F for three to five weeks with good light are needed for initiating flower spikes. Thorougly water and then let stand and do not water again until nearly dry. Apply a complete fertilizer on a regular schedule during the active growing season to one teaspoon per one gallon at each watering. Potting should be done in late spring or early summer after blooming is complete.

Satsuma Mandarin
Citrus reticulata
USDAZone9

Satsuma mandarin is one of the most cold tolerant citrus for Texas. The tree has attractive, evergreen foliage and produces white flowers with an awesome fragrance. The fruit is very sweet, juicy, easy to peel and is usually seedless.

Exposure: minimum of 8 to 10 hours of sun per day
Height: 8 to 10 feet high and wide on a rootstock in the ground; three to four feet in a container
Plant type: evergreen citrus tree
Planting time: early spring after danger of frost has passed
Soil type: adaptable if well drained or a well-drained potting soil
Suggested uses: accent plant for the patio and containers
Special notes: Performs best in hardiness zone 9. It will flower in early spring with fruit ripening in early to late fall. Containers should be at least 20 gallon with good drainage. Incorporate a slow release fertilizer into the mix and water with a water soluble fertilizer monthly. Containers can be moved in when a severe freeze warning is predicted. In ground plants may need some protection as well.

Miho Satsuma Mandarin
Citrus reticulata
USDAZone9

Miho Satsuma on its own roots produces a smaller tree that will come back true to type if frozen to the ground. Of all the Satsuma varieties Miho has performed the best. It produces an attractive evergreen tree with very fragrant flowers in early spring. The fruit ripens in early fall and is very sweet, easy to peel and usually seedless.

Exposure: minimum of 8 to 10 hours of sun per day
Height: five feet high and wide; a bit smaller in containers
Plant type: evergreen citrus tree
Planting time: early spring after the danger of frost has passed
Soil type: adaptable if well drained or a well-drained potting soil
Suggested uses: accent plant for the patio and containers
Special notes: Performs best in hardiness zone 9. It will flower in early spring with fruit ripening in early to late fall. If using a container, at least a 20 gallon size with good drainage is suggested. Incorporate a slow release fertilizer into the mix and water with a water soluble fertilizer monthly. Containers can be moved in when a severe freeze warning is predicted. In ground plants may need some protection as well.

Orange Frost Mandarin
Hybrid
Citrus reticulata
USDAZone8

Orange Frost Mandarin hybrid is a cross between a very cold hardy Changsha tangerine and a very high quality Satsuma. The fruit is very sweet, easy to peel and only has one or two seeds per fruit. More importantly the tree has more cold hardness than Satsuma and can be grown a bit further north.

Exposure: minimum of 8 to 10 hours of sun per day
Height: Eight to ten feet high and wide in the ground; four to six feet in containers
Plant type: evergreen citrus tree
Planting time: early spring after the danger of frost has passed
Soil type: adaptable if well drained or a well-drained potting soil
Suggested uses: accent plant for the patio and containers
Special notes: This Texas Superstar® should expand the planting zone for citrus in the ground to as far north as zone 8. Some protection will be required in the establishment phase. Trees will be on their own roots and will come back true if frozen back. The tree will also work well in containers. Amend the mix with slow release fertilizer and water once a month with a water soluble fertilizer.

‘NuMex Twilight’ Ornamental Pepper
Capsicum frutescens

A showy ornamental pepper that matures is about 85 days. Plants produce good yields of ¾” long by ½” wide hot, edible peppers. Peppers grow upright in clusters, are very hot, and turn from purple, to yellow, to orange, to red when mature. The effect is very showy against the green stems and leaves and white flowers. New growth, flowers and peppers are continually produced which keeps the plant showy all season long.

Exposure: Full sun
Height: 2 feet by 2 feet wide
Plant type: annual
Planting time: from spring through late summer from containers
Soil type: adaptable to good soil type with good drainage
Suggested uses: bedding in vegetable or flower gardens and in containers
Special notes: Can be started from seed in early spring and set out after all danger of frost is past. Excellent for mixing vegetables into ornamental flower gardens. This ornamental pepper is suitable for growing in pots or containers.
Texas Dawn
_Nymphaea spp._
USDA Zone Variable

Texas Dawn received the International Water Lily Society’s 1990 American Award. It can be expected to produce seven to eight blooms at a time by mid-summer. Texas Dawn produces rich yellow flowers with outer petals blushed pink, greenish yellow with pink border sepal and deep yellow anthers. Flower size is 3-8 inches with a lemony fragrance.

**Exposure:** full sun
**Height:** flowers grow 3-8 inches above the surface of the water
**Plant type:** perennial
**Planting time:** spring-summer when water temperature is 70-85°F
**Soil type:** heavy clay
**Suggested uses:** ponds, cut flowers, dry flowers
**Special notes:** Green top leaves speckled purple with purple undersides. Leaves are 8 inches with a 3-5 foot spread. Even though Texas Dawn requires full sun, it is one of a few varieties that can bloom with three hours of sun daily, increasing your landscaping options. Other well-adapted water lily varieties include Clyde Ikins, Colorado, Laydkeri Fulgens, Panama Pacific, Perry’s Double White, Red Flare and Star of Siam.

**Explanation of Symbols**

**USDA Hardiness Zones**

This designates the zone where a plant is typically considered cold hardy. Summer annuals do not have a hardiness designation, but winter annuals do. Please see the maps on the back cover for a key to the hardiness zones. The maps were prepared by the U.S. Department of Agriculture and can be found on the web site.

**Water Use**

The number of raindrop symbols denotes the level of water use that can be expected for a particular plant. Even the most drought tolerant plants need adequate moisture for initial establishment.

- = Low expected water use
- - = Moderate expected water use
- - - = High expected water use

**Texas Superstar® Deer-resistant plants**

The designated deer symbol indicates “deer resistant”. Deer tend to avoid some plants and relish others. While no plant can be guaranteed to be “deer-proof,” some types of plants are less appealing to deer. Highly recommended by many gardeners is a good deer repellent to prevent deer damage for a 6 month time frame after planting for plant establishment.
Texas Superstars perform best at the hardiness zones indicated; however, Texas Superstars are widely adapted across the state.

Due to the wide diversity in climatic conditions across the State of Texas, some perennial plants may be treated as annuals. Contact your local Extension Agent for advice.
